# John Pohl

Full Stack Developer

## 👤 Profile

Have spent the past 14 years working in the restaurant industry holding every role from dishwasher to cook to server to manager. I am always looking to learn something new and grow on that.

## 💼 Employment History

### Restaurant Manager at Mike & Tony's Gyros, Pittsburgh

April 2014

I started off as a server and quickly moved up into a manager roll where I managed a full front of house of the restaurant/bar by scheduling all wait staff and handling orders for the restaurant. I handled all interview duties for the front of house and was the main trainer for all new employees. I have become servsafe certified, RAMP certified as a server and as a owner/manager.

### Shift Supervisor at Primanti Bros., Pittsburgh

June 2011 — March 2014

I started off as a line cook where I made sure all food was cooked to a good standard. I then moved into a shift supervisor role after a few months of working there. In that role, I over saw all staff during the shift making sure everything ran smoothly and all guests enjoyed their food and their stay. I also handled certain orders for the restaurant such as food orders and alchohol orders.

## 🎓 Education

### Full Stack Web Developer, University of Pennsylvania LPS, Remote

November 2021 — May 2022

I attended Univeristy of Pennsylvania LPS coding bootcamp. The course was held online where I learned to become a full stack web developer using html, css, javascript, react, mongoDB, MySQL, Node.js, express.js, plus many more.

### Secondary Education, Clarion University of Pennsylvania, Clarion

August 2010 — November 2011

I attended Clarion University of Pennsylvania on a football scholarship and to pursue a degree in secondary education.

### General Studies, Community College of Allegheny County, Pittsburgh

June 2011 — March 2020

I attended the Community College of Allegheny County on and off after attending Clarion University to pursue a associates degree in General studies.
